Profile

Self taught full stack developer with strong experience building production ready applications using the MERN stack and PHP Laravel. Skilled in creating responsive interfaces, secure APIs, database driven systems and real time features. Focused on clean code, performance and delivering solutions that solve business problems with a mature, professional engineering approach.

Skills

Frontend: React, Next, React Native, Tailwind, MUI, Redux Toolkit, JavaScript, TypeScript
Backend: Node, Express, Nest, PHP, Laravel
Databases: MongoDB, MySQL, NoSQL
Tools: Git, GitHub, REST APIs, JWT auth, deployment
Other: UI design, system design, problem solving

Projects

Educational Investment Simulator (MERN)

07/2025 – 10/2025

- Created an investment simulator managing over 300 user transactions and withdrawals.
- Integrated CoinMarketCap and TradingView APIs for real time crypto data.
- Implemented custom JWT auth and validation to prevent negative balance.
- Developed transactional flows for deposits, plans and performance tracking.
- GitHub: <https://github.com/SegundamanoDev/coinrise> | <https://github.com/SegundamanoDev/coinrise-backend>

Logistics Tracking Application (MERN)

01/2024 – 04/2024

- Built a logistics platform with role based access for Client, Driver and Admin.
- Implemented real time package tracking using React Leaflet with Google Maps tiles.
- Designed dynamic route calculation for 50 plus simulated shipments.
- Developed a clean, responsive UI using modular React components and plain CSS.
- GitHub: <https://github.com/SegundamanoDev/luckyBash> | <https://github.com/SegundamanoDev/luckyBash-backend>

Certificates

Freecodecamp

JavaScript Algorithms and Data Structures — FreeCodeCamp

Courses

- MERN Stack Development — Udemy (2023)
- Modern PHP and Laravel — Udemy (2023)
- JavaScript Algorithms and Data Structures — FreeCodeCamp (2023)

Education

Secondary School Certificate
Self taught full stack developer through online learning and hands on projects.

Professional Experience

Full Stack Developer

Freelance / Personal Projects

01/2022 – Present | Benin City, Nigeria

- Built complete MERN and Laravel based applications from UI to backend.
- Implemented authentication, transactions, routing, dashboards and role management.
- Designed responsive interfaces with React, Tailwind, MUI and custom CSS.
- Managed MySQL and MongoDB with optimized schemas and data workflows.
- Deployed full stack projects and handled maintenance, debugging and scaling.
